

## Track 2: Challenge 1 - Printable Cube Faces

Use these print-ready cube face images to prepare your own practice cubes for Challenge 1. Teams can download, print, cut, and then paste the provided cube faces onto their existing Quarky cubes to recreate the required cube designs and practise the recognition-based challenge before the competition.

### Elementary:

Challenge 1: Number 1 Cube -  
Inorganic Waste (Top Face)

Challenge 1: Number 2 Cube -  
Organic Waste (Top Face)

### Junior and Senior:

Challenge 1: Inorganic Waste Cube  
(Top Face)

Challenge 1: Organic Waste Cube  
(Top Face)

### Note:

- Print the cube face images at 100% actual size on **A4 paper**, then cut and paste them carefully onto your existing Quarky cubes to maintain the required dimensions and ensure reliable image recognition.
- We recommend using the **Codeavour 8.0 Track 2 Arena Objects Kit** to access the actual arena objects that will be used in the main competition and practise with the complete setup. Printing and practising with these additional resources may not accurately replicate the physical competition objects and do not guarantee the same results during the competition.
